Research Interests

My research interests include ubiquitous computing, machine learning and statistical learning with applications in occupancy sensing, indoor localization, Internet of Things (IoT), smart home and cyber-physical systems.

Experiences

- Since 2017 **Department of EECS, UC Berkeley** Lead Researcher
Develop device-free occupancy sensing system with commodity WiFi IoT devices to realize fine-grained occupancy detection, counting and tracking in smart buildings.
Develop device-free wireless sensing system for human activity recognition, human identification and gesture recognition with commodity WiFi IoT devices for elderly healthcare and smart home automation.
Design deep learning and transfer learning algorithms to construct robust and adaptive classifiers for human identification, activity and gesture recognition.
- 2012 - 2016 **Nanyang Technological University, Singapore** Graduate Student Researcher
Designed a novel non-intrusive (no App installation) WiFi-based indoor positioning system (IPS) with a user-friendly web interface for reliable indoor navigation and real-time occupancy sensing.
Proposed 7 advanced localization algorithms to address longstanding challenges of IPS (e.g. device heterogeneity and environmental dynamics issues) for higher localization accuracy, reliability and efficiency.
Designed and prototyped a framework by integrating GPS (outdoor), iBeacon (semi-outdoor) and WiFi (indoor) for accurate indoor-outdoor detection with fast-response, and seamless navigation in all environments.
- 2012 - 2016 **Berkeley Education Alliance for Research in Singapore** Lead Researcher
Deployed and Implemented the proposed IPSs in 11 distinct indoor environments with 95000 ft² in U.S.A., Singapore, Taiwan and Germany.
Realized seamless indoor navigation services for customers with optimal path guidance on mobile devices and wearable devices (e.g. Google Glass).
Developed an indoor geo-fencing platform for occupancy adaptive lighting and air-conditioning system in the smart home and smart buildings.
